7. RISK FACTORS

The Manager encourages investors to consider the risks associated when investing in the Fund. If in doubt, investors should seek independent financial advice before investing in the Fund.

The risk management strategy of the Fund entails active management of the tenures (maturities) of the investments in fixed income securities issued by financial institutions as well as setting limits on the credit quality of the investments in the portfolio.

7.1 General Risks

Below are some of the general risks which investors should be aware of when investing in the Fund.

Market risk

Market risk arises because of factors that affect the entire market. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. The Fund will be exposed to market uncertainties due to the factors stated above and this in turn will affect the value of the investments either in a positive or negative way.

Fund management risk

Investors rely on the experience and expertise of the fund management team of the Manager to make investment decisions for the Fund. A failure on the part of the fund management team to display the requisite experience and expertise expected of them in making such decisions may jeopardize the Fund's performance and returns.

Performance risk

The performance of the Fund depends on the investments of the Fund. If there is a default, there will be a negative impact on the performance of the Fund. The performance of the Fund may also be affected if the allocation of assets is not properly done. This is where the experience and expertise of the Fund Manager are important as highlighted in the fund management risk write-up above. In view of the aforesaid, there is never a guarantee that investing in the Fund will produce the desired investment returns or the distribution of income.

Inflation risk

Inflation rate risk is the risk of potential loss in the purchasing power of investment due to a general increase of consumer prices. Inflation erodes the nominal rate of return giving a lower real rate of return. Investors are advised to take note that the Fund is not designed with the objective of matching the inflation rate of Tanzania.

Operational risk

This risk refers to the possibility of a breakdown in the Manager's internal controls and policies. The breakdown may be a result of human error (for instance the keying of wrong details), system failure (causing unnecessary downtime) or even fraud (where employees of the Manager collude with one another). This risk may cause monetary loss to the Fund and/or inconvenience to investors.

The Manager will regularly review its internal policies and system capability to minimize the occurrence of this risk. Additionally, the Manager maintains a strict segregation of duties to minimize occurrence of fraudulent practices amongst employees of the Manager.

7.2 Specific Risks

The specific risks affecting investments in this Fund may include but are not limited to:

Interest Rate risk

The risk refers to how the changes in the interest rate environment would affect the performance of the fund's portfolio. In the event of a decreasing interest rate environment, fixed income securities and financial institutions may offer lower interest rates, effectively reducing the potential returns of the fund's portfolio.

Liquidity risk

This risk refers to the possibility that the investments of the Fund cannot be readily sold or converted into cash without incurring significant loss in value. For example, disposing a relatively illiquid instrument may result in a disadvantage to the Fund as there may not be a buyer, or sufficient buyers, available for the said instrument. This lack of demand or low trading volume may cause the value of the Fund to drop. This risk shall be mitigated through a diversified asset allocation in terms of the type of instruments and the tenure of the investment instruments.

Credit/Default risk

This risk refers to the possibility that a financial institution issuer of instruments will not be able to meet the scheduled interest and/or principal repayments. This may lead to a reduction in the value of the Fund due to income and/or capital losses. In general, this risk can be mitigated by investing in instruments that are issued by strong and highly rated financial institutions.

Foreign Exchange Risk

Changes in exchange rates may affect the value of the scheme's investments in foreign currency denominated securities.

7.3 Risk Management/Mitigation

The Fund shall manage these risks through a comprehensive investment policy and holding a diversified portfolio across eligible issuers with strong credit metrics, while undertaking regular analysis of the payment ability of issuers in meeting interest and principal repayments. Interest rate risks shall be mitigated by a diversification strategy of holding instruments with different tenures and coupon rates.

8. RIGHTS AND LIABILITIES OF UNIT HOLDERS

8.1 Unit Holders' Rights

Subject to the provisions of the Trust Deed, Unit Holders shall have the right to:

- a) Receive distributions, if any, from the Fund.
- b) Participate in any increase in the NAV of Units of the Fund.

Neither would Unit Holders have the right to interfere with or to question the exercise by the Trustee (or by the Manager on the Trustee's behalf) of the rights of the Trustee as trustee of the investments of the Fund.

8.2 Unit Holders' Liabilities

As a Unit Holder of the Fund, and subject to the provisions of the Trust Deed, Unit Holders' liabilities would be limited to the following:

- a) Unit Holders would not be liable for, nor would Unit Holders be required to pay any amount in addition to the payment for Units of the Fund as set out in this Offer Document and the Trust Deed.
- b) Unit Holders would not be liable to indemnify the Trustee and/or the Manager in the event that the liabilities incurred by the Trustee and/or the Manager on behalf of the Fund exceed the NAV of the Fund.

9. POWER TO CALL FOR UNIT HOLDERS MEETINGS

9.1 Meetings Directed by the Unit Holders

Unit Holders may call for a meeting for any purpose.

Unless otherwise required or allowed by the relevant laws, the Manager shall, within twenty-one (21) days of receiving a direction from not less than one-tenth (1/10) of Unit Holders at the registered office of the Manager, summon a meeting of the Unit Holders by:

- a) giving at least fourteen (14) days written notice of the meeting to Unit Holders; and

9.4 Provisions Governing Unit Holders' Meetings

Quorum

The quorum for meetings at which a special or extraordinary resolution is to be considered shall be the holders of twenty-five per cent (25%) of the units in issue; and ten per cent (10%) if only an ordinary resolution is to be considered.

If within half an hour from the time appointed for the meeting a quorum is not present, the meeting shall stand adjourned for not less than fifteen days and the quorum at an adjourned meeting shall be those persons present in person or by proxy.

Proxies: Unit holders shall be able to appoint proxies.

9.5 Decision making:

- i. Votes shall be proportionate to the number of Units held.
- ii. The Trustee/Custodian, Manager and their associated persons are prohibited from voting their beneficially owned units at or counted in the quorum for a meeting at which they have material interest in the business to be conducted.
- iii. An ordinary resolution may be passed by a simple majority of the votes of those present and entitled to vote in person or by proxy at a duly convened meeting.
- iv. A special or extraordinary resolution may only be passed by seventy five per cent or more of the votes of those present and entitled to vote in person or by proxy at a duly convened meeting.

9.6 Termination of the Fund

The Fund may be terminated or wound up should the following events occur:

- a) The CMSA's approval is revoked.
- b) A Special Resolution is passed at a Unit Holders' meeting to terminate or wind up the Fund; and
- c) Such other events and situations as provided in the Trust Deed.
